SQF Quality Code Pros

- Can be used with any GFSI benchmarked or technically equivalent food safety code
 - No other GFSI benchmarked certification has a quality code
- Aligns closely with the SQF Food Safety Codes with regards to numbering and requirements
 - Easier to learn with knowledge of the SQF Food Safety Codes
 - Eliminates some duplication of work (risk assessments, mitigation plans, annual program challenges)
- Pass or fail grading
 - Successful upon closure of all deviation corrective actions and achievement of a food safety certificate
- Can be combined with the SQF audit or conducted separately as the site chooses
- Positive impact to overall Cost of Quality

Cost of Quality

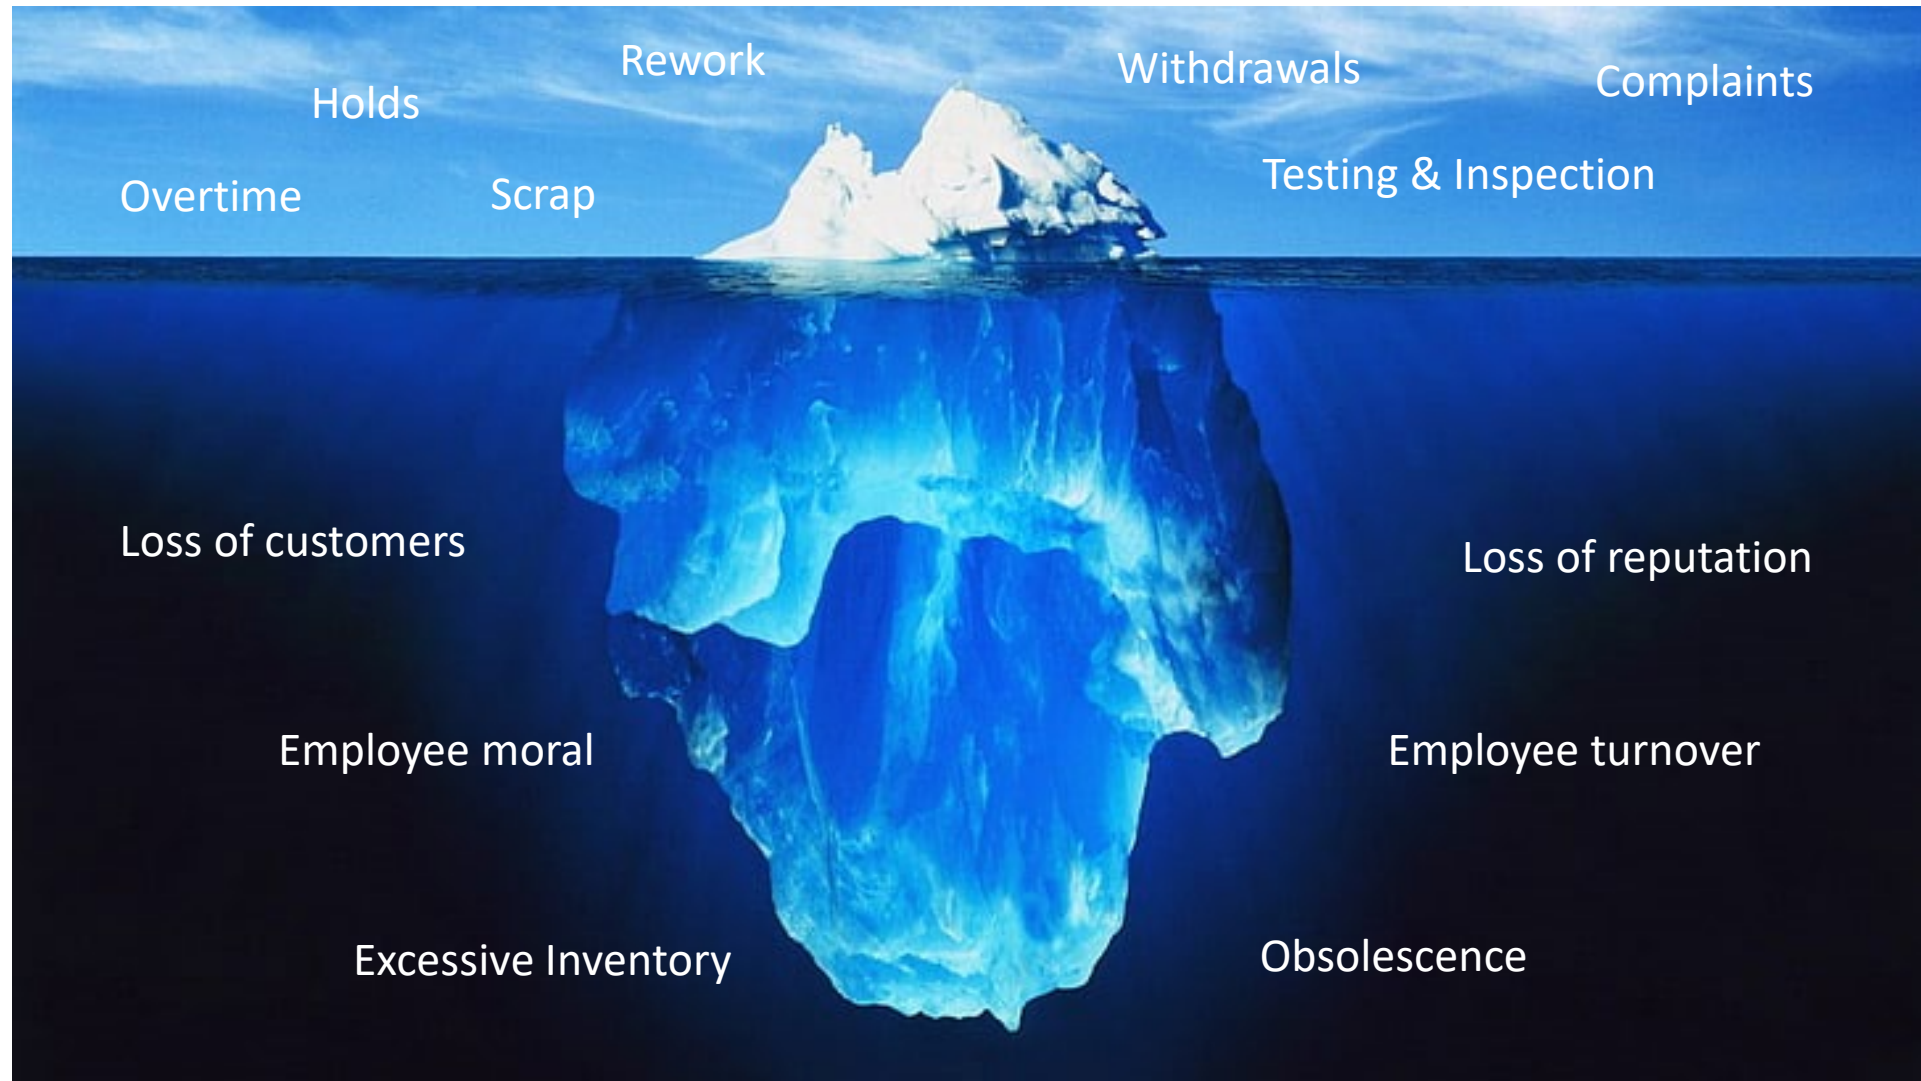

- Typical company's cost of quality can equal to about 25% of sales with some reaching 40-50%
- For every \$1 spent on prevention costs the appraisal and failure costs can be reduced as much as \$7-10
